1. 下載綠界 SDK 程式(https://www.ecpay.com.tw/Service/API Dwnld)

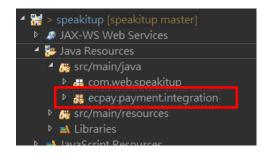

2. 將下載完的檔案解壓縮,放進專案內

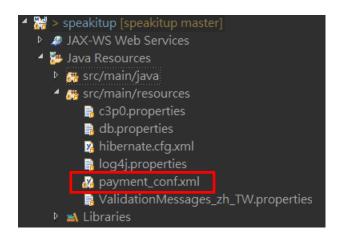

將 ecpay 資料夾整個放入專案中 src/main/java 路徑下

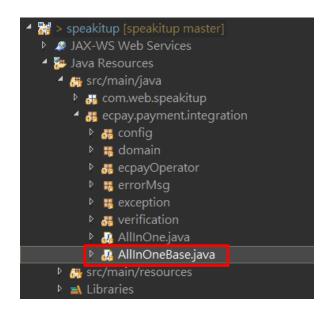

將 payment_conf.xml 檔放入專案中 src/main/resources 路徑下

3. 改寫 xml 檔路徑

打開專案中 ecpay 內的 AllInOneBase.java

修改 paymentConfPath 為 payment_conf.xml 檔的絕對路徑

(專案資料夾路徑/src/main/resources/payment_conf.xml)

```
public AllInOneBase(){
    try{
        Document doc;
        /* when using web project*/
        ClassLoader classLoader = Thread.currentThread().getContextClassLoader();
        String configPath = URLDecoder.decode(classLoader.getResource("/payment_conf.xml").getPath(), "UTF-8");
        doc = EcpayFunction.xmlParser(configPath);
        /* when using testing code*/
        String paymentConfPath = "./src/main/resources/payment_conf.xml";
        String paymentConfPath = "C:/TOOLS/JAVA/workspace/speakitup/src/main/resources/payment_conf.xml";
        doc = EcpayFunction.xmlParser(paymentConfPath);
```

4. 修改 payment_conf.xml 檔

(此處為忽略信用卡以外付款方式)

```
version="1.0" encoding="utf-8"?
?xm1
Conf>
   <OperatingMode>Test< !--Test or Production-->
   <MercProfile>Stage_Account</MercProfile>
   <IsProjectContractor>N</IsProjectContractor>
   <MerchantInfo>
       <MInfo name="Production Account">
           <MerchantID></MerchantID>
           <HashKey></HashKey>
           <HashIV></HashIV>
       </MInfo>
       <MInfo name="Stage Account">
           <MerchantID>2000132</merchantID>
           <HashKey>5294y06JbISpM5x9/HashKey>
           <HashIV>v77hoKGq4kWxNNIS</HashIV>
       </MInfo>
   </MerchantInfo>
  <IgnorePayment>
       <Method>WebATM</Method>
       <Method>ATM</Method>
       <Method>CVS</Method>
       <Method>BARCODE</Method>
   </IgnorePayment>
/Conf>
```

5. 設定綠界參數 (綠界介接完整文件: https://www.ecpay.com.tw/Content/files/ecpay_011.pdf) 取得測試資料 (p.17)

欄位說明	欄位內容		
特店編號(MerchantID)	2000132	2000214(非 OTP)	
平台商編號 (PlatformID)			3002599
廠商管理後台登入帳號/ 密碼	stagetest1234/test1234	Stage2000214/test1234	stagetest2/test1234
身分證件末四碼/統一編號	53538851		3609
廠商管理後台 測試環境	https://vendor-stage.ecpay.com.tw 此網站可提供:1. 查詢 ecpay 訂單,2. 模擬付款並通知特店 若執行模擬付款功能,無法收到付款通知時,請留意此表後注意事項。		
ALL IN ONE 介接 HashKey	5294y06JblSpM5x9		spPjZn66i0OhqJsQ
ALL IN ONE 介接 HashIV	v77hoKGq4kWxNNIS		hT5OJckN45isQTTs
信用卡測試卡號	4311-9522-2222-2222 (注意事項: 只有此組卡號可測試交易成功流程)		
信用卡測試安全碼	222		
信用卡測試有效月/年	輸入的 MM/YYYY 值請大於現在當下時間的月年,例如在 2016/04/20 當天作測試,請設定 05/2016(含)之後的有效月年,否則回應刷卡失敗。		
對外 IP	請參考級界 FAQ:是否可限制只允許級界 IP 連入公司的 Server_		

根據付款方式選擇類別

(此處 AioCheckOutDevide 為使用信用卡)

```
@GetMapping("/goECPay")
public void goECPay(Model model, HttpServletRequest request, HttpServletResponse response, HttpSession session)
   OrderBean ob = (OrderBean) request.getAttribute("orderBean");
   AllInOne aio = new AllInOne("");
   AioCheckOutDevide aioCheck = new AioCheckOutDevide();
   /* 特店編號 */
   aioCheck.setMerchantID("2000214");
   SimpleDateFormat sdf = new SimpleDateFormat("yyyy/MM/dd HH:mm:ss");
    aioCheck.setMerchantTradeDate(sdf.format(new Date()));
   aioCheck.setTotalAmount(ob.getTotalPrice().toString());
    aioCheck.setTradeDesc("speakitup");
    aioCheck.setItemName("500");
   aioCheck.setMerchantTradeNo("testSpeakitup" + ob.getOrderNo());
   aioCheck.setReturnURL("https://speakitup.nctu.me/order/returnURL");
   aioCheck.setOrderResultURL("https://speakitup.nctu.me/order/showHistoryOrder");
   PrintWriter out = response.getWriter();
   response.setContentType("text/html");
    out.print(aio.aioCheckOut(aioCheck, null));
```

特店編號(MerchantID)輸入測試資料,其他按照文件內格式設定

!特店交易編號(MerchantTradeNo)不能重複!

```
@GetMapping("/goECPay")
public void goECPay(Model model, HttpServletRequest request, HttpServletResponse response, HttpSession session)
   OrderBean ob = (OrderBean) request.getAttribute("orderBean");
   AllInOne aio = new AllInOne("");
   AioCheckOutDevide aioCheck = new AioCheckOutDevide();
   aioCheck.setMerchantID("2000214");
   SimpleDateFormat sdf = new SimpleDateFormat("yyyy/MM/dd HH:mm:ss");
   aioCheck.setMerchantTradeDate(sdf.format(new Date()));
   aioCheck.setTotalAmount(ob.getTotalPrice().toString());
   aioCheck.setTradeDesc("speakitup");
   aioCheck.setItemName("500");
   aioCheck.setMerchantTradeNo("testSpeakitup" + ob.getOrderNo());
   aioCheck.setReturnURL("https://speakitup.nctu.me/order/returnURL");
   aioCheck.setOrderResultURL("https://speakitup.nctu.me/order/showHistoryOrder");
    PrintWriter out = response.getWriter();
    response.setContentType("text/html");
    out.print(aio.aioCheckOut(aioCheck, null));
```

輸出給綠界(如需開立發票,此處 null 需另外設定 InvoiceObj 物件 p.28)

```
@GetMapping("/goECPay")
public void goECPay(Model model, HttpServletRequest request, HttpServletResponse response, HttpSession session)
   OrderBean ob = (OrderBean) request.getAttribute("orderBean");
   AllInOne aio = new AllInOne("");
   AioCheckOutDevide aioCheck = new AioCheckOutDevide();
   aioCheck.setMerchantID("2000214");
   SimpleDateFormat sdf = new SimpleDateFormat("yyyy/MM/dd HH:mm:ss");
    aioCheck.setMerchantTradeDate(sdf.format(new Date()));
   aioCheck.setTotalAmount(ob.getTotalPrice().toString());
    aioCheck.setTradeDesc("speakitup");
    aioCheck.setItemName("500");
    aioCheck.setMerchantTradeNo("testSpeakitup" + ob.getOrderNo());
    aioCheck.setReturnURL("https://speakitup.nctu.me/order/returnURL");
   aioCheck.setOrderResultURL("https://speakitup.nctu.me/order/showHistoryOrder");
   PrintWriter out = response.getWriter();
   response.setContentType("text/html");
   out.print(aio.aioCheckOut(aioCheck, null));
```

6. 用 post 承接綠界回傳值(RtnCode==1 為交易成功 p.36)

7. 用 post 承接交易完成後的頁面跳轉(此處付款完畢後頁面跳轉至歷史訂單)
